BORG
MANUFACTURING

With an outstanding array of colours, styles and surface finishes, the **polytec laminates**' range comprises of HIGH PRESSURE LAMINATES (HPL), CONTINUOUS LAMINATES (CPL) and COMPACT LAMINATES (CL). We are able to maintain excellent technical properties with a high degree of consistency, resulting in the best quality products manufactured to the highest quality standards.

polytec laminates is owned by an Australian private company Borg and with the latest in world class technology, product development and at the forefront of innovation, Borg has grown to be one of the largest decorative surfaces manufacturers in Australia with over 1200 employees and four manufacturing sites.

All **polytec** products conform to the appropriate international standards and we are committed to responsible manufacturing, the environment and the safety of our employees.

polytec colours combine modern trends with popular classics to create a fashionable range in a selection of thicknesses, sizes and surface finishes. From benchtops to desks and furniture, cubicle partitions and lockers whatever your project requires, **polytec laminates** provide a hard wearing, long lasting and low maintenance surface at an affordable price.

solid MATT

Colour can change our moods and feelings and when used creatively and confidently can change the look and feel of any space from ordinary to exceptional.

technical INFORMATION

TECHNICAL

polytec HIGH PRESSURE LAMINATES comprise of top-quality materials with excellent technical properties.

They consist of cellulose selected papers, impregnated with resin and produced under heat and high pressure.

Comprises of quality materials with excellent technical properties :

- scratch and wear resistant
- not adversely affected by moisture, burn marks and stains, nor suffer from colour instability
- smooth and non-porous surface, does not support the growth of bacteria or fungi
- good chemical resistant, can withstand all commonly used non-abrasive cleaning agents and aggressive disinfectants
- heat resistant, do not melt, drip or explode, retains their stability for a long time
- impact resistant

Meets the requirements of European Standard EN 438-2.

Standard size : 1,220 mm x 2,440 mm

Please contact our sales representatives for different sizes.

CLEANING

Laminates should be cleaned as follows:

Using a mild household spray wipe down the laminate with a soft cloth taking care not to rub too hard. Dry using a soft cloth so as not to leave any solvent on the laminate.

You may also use Methylated Spirit on a soft cloth, using a circular cleaning motion.

Thoroughly clean over the wider area with water and detergent on a damp cloth afterwards to remove any residual Methylated Spirit.

Always ensure that you refer to the recommendations provided by the cleaning product manufacturer before use.

MAINTENANCE

To ensure that your Warranty will not be void, DO NOT use any of the following on laminate:

Commercial Cleaning Products, Abrasive Cleaners, Scouring Pads or Abrasive Papers, Solvents, Thinners, Turpentine (Turps), Ammonia, Bleach, Acetone, M.E.K. and any other cleaning agents containing Organic Solvents or the above mentioned products.

DO NOT use sharp objects such as knives on the laminate surface.

DO NOT place hot cookware directly on the laminate.

DO NOT flood the laminate at the joints which may cause the substrate to expand.

CERTIFICATION

Certification No. 042-033-2065

Environmentally Improved Low Emission Low Toxicity

polytec products carry the Singapore Green Label from the Singapore Environment Council for meeting the established stringent eco standards.

Only products carrying the Singapore Green label qualify for Singapore Building Construction Authority's Green Mark programme.

polytec is committed to environmental awareness and preservation.

Choose **polytec** and make a difference.

DISCLAIMER

Kindly inspect products prior to installation. **polytec's** liability for any possible manufacturing defect will be limited to the extent of the cost of the product only.
